Current uses, emerging applications, and clinical integration of artificial intelligence in neuroradiology

B. Fiani | K. Pasko | Kasra Sarhadi | C. Covarrubias | Medicine, Computer Science ·

Reviews in the Neurosciences · 10 September 2021

TLDR This literature **review** evaluated data across several subspecialties of neurology and neurosurgery including vascular neurology, spinal pathology, traumatic brain injury, neuro-oncology, multiple sclerosis, Alzheimer’s disease, and epilepsy. Expand

Enhancing Water Quality Forecasting with Lstm and Attention-based Deep Learning: Toward Scalable, Long-term Monitoring of Surface Water Bodies

Memory Marozva | Munyaradzi Rushambwa | Peter BukhelaniMusiiwa

Environmental Science, Computer Science · International Journal for Sciences and Technology · 1 August 2025

TLDR This paper demonstrates how the AI-based predictive analytic system was created as a means of developing a more complete, accurate, and effective system, and proposes a hybrid **deep learning** model that combines Long Short-Term Memory (LSTM) networks with an attention mechanism. Expand

Advancing Forest Fire Prevention: Deep Reinforcement Learning for Effective Firebreak Placement

Lucas Murray | Tatiana Castillo | +5 authors | Jordi Garc'ia-Gonzalo

Environmental Science, Computer Science · arXiv.org · 12 April 2024

TLDR This study proposes using **artificial intelligence techniques**, specifically **Deep** Reinforcement **Learning**, to address the complex problem of **fire**break placement in the landscape, and successfully implemented a computational agent capable of **learning fire**break locations within a **forest** environment. Expand

Applications of Machine Learning in Aircraft Maintenance

Umur Karaoğlu | Osinachi Mbah | Q. Zeeshan | Engineering, Computer Science ·

Journal of Engineering **Management** and Systems… · 30 March 2023

TLDR This paper provides a comprehensive **review** of the ML **techniques** like Multilayer Perceptron (MLP), Logic Regression (LR), Random **Forest** (RF), **Artificial** Neural Network (ANN), Support Vector Regression (SVR), Linear Regression (LR), and other common ML **techniques** for their present implementation and potential future applications in aircraft maintenance. Expand

Machine learning as a support tool in wastewater treatment systems – a short review

S. Radović | S. Pap | M. Turk Sekulić | Environmental Science, Computer Science · Proceedings · 3 November 2022

TLDR Application of ML in solving or avoiding potential problems within WWTS is a promising approach which has gained more attention in recent years due to the exponential technology development and progress in **artificial intelligence** application. Expand

AI-Driven Energy Management in Green Cloud Computing: A Systematic Review

Sugandha Goel Monika Bajpai Environmental Science, Computer Science ·

International Journal For Multidisciplinary... · 19 June 2025

TLDR A comprehensive **review** of how AI **techniques** are applied to energy **management** in cloud environments draws insights from 35 scholarly publications, revealing that AI applications can lower data centre energy consumption by 20% to 40% though issues such as real-time adaptability and system compatibility remain barriers. Expand

Leveraging Explainable Artificial Intelligence (XAI) for Expert Interpretability in Predicting Rapid Kidney Enlargement Risks in Autosomal Dominant Polycystic Kidney Disease (ADPKD)

Latifa Dwiyanti Hidetaka Nambo Nur Hamid Medicine, Computer Science ·

Applied Informatics · 28 October 2024

TLDR The results indicated that incorporating XAI and textual summaries significantly improved expert explainability and increased confidence in the model's ability to support treatment decisions for ADPKD patients. Expand

Application of data mining and machine learning in management accounting information system

Xiaofang Zhang Computer Science, Business · 2021

TLDR This paper combines **machine learning** algorithms to build an intelligent **management** accounting information system and realizes the close connection between corporate finance and business, which helps to form a closed-loop **management** between financial analysis, risk **management**, performance **management**, and decision-making. Expand

A Review on Advances in Indian Sign Language Recognition: Techniques, Models, and Applications

Ms. Rashmi J Mr. Saurav Sahani Mr. Pulkit Kumar Yadav Computer Science, Linguistics ·

International Journal for Research in Applied... · 30 November 2024

TLDR This **survey** emphasizes the role of **machine learning** models, from Random **Forest**s to state-of-the-art Large Language Models (LLMs), in addressing linguistic variability and enabling cross-linguistic translations between sign languages. Expand

Carbon Sequestration in Coastal Ecosystems: A Review of Modeling Techniques and Applications

Faria Jahan Environmental Science, Computer Science · Social Science Research Network ·

3 February 2025

TLDR The findings reveal that AI-enhanced models improve biomass estimation accuracy by up to 28%, outperforming conventional remote sensing approaches, and UAV-based LiDAR assessments achieved error margins within ±5%, demonstrating superior precision in carbon stock estimations. Expand
