A Review on Artificial Intelligence and Quantum Machine Learning for Heart Disease Diagnosis: Current Techniques, Challenges and Issues, Recent Developments, and Future Directions

Huda Ghazi Enad | M. A. Mohammed | Medicine, Computer Science ·

Fusion: Practice and Applications · 2023

TLDR This study seeks to guide the use of AI-based **techniques** for heart disease detection, having an ultimate objective of enhancing patient outcomes through research and development. Expand

A Survey on the Role of Artificial Intelligence and Machine Learning in 6G-V2X Applications

Donglin Wang | A. Qiu | Qiuheng Zhou | Hans D. Schotten | Computer Science, Engineering ·

World Forum on Internet of Things · 11 June 2025

TLDR This **survey** comprehensively **reviews** recent advances in AI and ML models applied to 6G-V2X communication and focuses on state-of-the-art **techniques**, including **Deep Learning**, Reinforcement **Learning**, Generative **Learning**, and Federated **Learning**, with particular emphasis on developments from the past two years. Expand

AI in Agriculture: A Survey of Deep Learning Techniques for Crops, Fisheries and Livestock

Umair Nawaz | Muhammad Zaigham Zaheer | F. Khan | Hisham Cholakkal | Salman H. Khan | R. Anwer

Agricultural and Food Sciences, Computer Science · arXiv.org · 29 July 2025

TLDR This **survey** presents a systematic and thorough **review** of more than 200 research works covering conventional **machine learning** approaches, advanced **deep learning techniques**, and recent vision-language foundation models in the agriculture domain, focusing on diverse tasks such as crop disease detection, livestock health **management**, and aquatic species monitoring. Expand

Machine Learning-Powered AI Chatbots in Pharmacy Practices: A Survey of Techniques, Applications, and Future Directions

Salwa Aurellia Irene Putri Dasirin | A. A. Styawan | M. T. Ghozali | Medicine, Computer Science ·

2025 5th International Conference on Electronic… · 6 August 2025

TLDR This **survey** presents a comprehensive **review** of **machine learning** methodologies employed in pharmacy chatbots, including supervised, unsupervised, and hybrid models, and explores current limitations, including data privacy risks, linguistic challenges, and fragmented regulatory standards. Expand

Crop yield prediction in agriculture: A comprehensive review of machine learning and deep learning approaches, with insights for future research and sustainability

Md. Abu Jabed | Masrah Azrifah Azmi Murad | Agricultural and Food Sciences, Computer Science ·

Heliyon · 1 November 2024

TLDR The findings of this study shed light on the transformative potential of advanced AI **techniques** in improving crop yield estimation accuracy, ultimately enhancing agricultural planning and resource **management**. Expand

EARLY DETECTION AND CLASSIFICATION OF KNEE DISEASE USING MACHINE LEARNING AND DEEP LEARNING TECHNIQUES: AN OVERVIEW

M. S. M. Gunde D. P. P. Mane Medicine, Computer Science ·

International Journal of Applied Mathematics · 10 September 2025

TLDR This **survey** aims to guide future research by identifying gaps, highlighting best practices, and providing a foundational understanding of intelligent systems for early knee disease detection by identifying gaps, highlighting best practices, and providing a foundational understanding of intelligent systems for early knee disease detection. Expand

Machine Learning And Artificial Intelligence in Diabetes Prediction And Management: A Comprehensive Review of Models

Md Ashraful Alam Amir Sohel K. Hasan Mohammad Ariful Islam

Medicine, Computer Science · Innovatech Engineering Journal · 17 December 2024

TLDR A systematic **review** of 82 high-quality peer-**reviewed** articles is conducted to provide a comprehensive evaluation of ML and AI applications in diabetes prediction and **management**, highlighting the widespread adoption of supervised **learning** models, such as Random **Forest** and Support Vector **Machines**, which consistently demonstrate high accuracy and reliability in predicting diabetes risk. Expand

AI-Driven Inventory and Supply Chain Optimization: A Comparative Review of Tree-Based Machine Learning and Sequence Deep Learning Models

S. Rajput Chetansinh R. Vaghela Jaymin V. Soni Computer Science, Business ·

Asian Journal of Research in Computer Science · 29 September 2025

TLDR This study uses the PRISMA methodology to comprehensively analyze 42 peer-**reviewed** articles that were published between 2019 to August 2025 and highlights the potential of explainable AI and hybrid architectures to bridge the gap between theory and practice. Expand

A Systematic Review of Machine Learning and Deep Learning Approaches for Credit Card Fraud Detection

GannaTullah Gouda Abdelrahman Mahmoud Ahmed Khaled Abdulfatah Ali Mohamed Shady A.Abdelmoneim Asmaa F. Hassan

Computer Science, Business · International Conferences on Computing… · 22 December 2025

TLDR This paper lays out a strategic AI research roadmap for future advances in fraud detection, highlighting the importance of explainable, adaptive, and scalable AI solutions to manage shifting risks and practical implementation challenges. Expand

Machine Learning and Plant Disease Detection: A Brief Review

Swarajya Lakshmi .P Computer Science, Agricultural and Food Sciences ·

Journal of Advances in Science, Engineering and… · 2025

TLDR An extensive evaluation of current progress in employing ML methods for plant disease detection is presented, including the role of image processing combined with **deep learning** and traditional ML classifiers in disease identification. Expand
