Artificial Intelligence in Diabetes Management: Revolutionizing the Diagnosis of Diabetes Mellitus; a Literature Review

Alireza Keshtkar | Nazanin Ayareh | +6 authors | Mohammadhossein Dabbaghmanesh

Medicine, Computer Science · Shiraz E Medical Journal · 23 July 2024

Context: The diagnostic methods for diabetes mellitus (DM), a chronic metabolic disorder characterized by elevated blood sugar levels, are rapidly evolving thanks to **artificial intelligence** (AI),... Expand

Artificial intelligence in polycystic ovary syndrome: a systematic review of diagnostic and predictive applications

M. Ghaderzadeh | Ali Garavand | Cirruse Salehnasab | Medicine, Computer Science ·

BMC Medical Informatics and Decision Making · 24 November 2025

TLDR A comprehensive synthesis of AI applications in PCOS is provided, with emphasis on diagnostic performance, biomarker discovery, risk prediction, clinical decision support, model interpretability, and the emerging use of generative AI. Expand

6 | Springer Nature | Save | Cite

Utilizing Machine Learning for Early Intervention and Risk Management in the Opioid Overdose Crisis

A. M. Tai | Alireza Kazemi | +5 authors | R. M. Krausz | Medicine, Computer Science ·

WIREs Computational Statistics · 7 January 2025

TLDR The study reveals the efficacy of ML in illicit opioid use, with a notable predominance of supervised ML models, particularly Logistic Regression, particularly Logistic Regression. Expand

Harnessing artificial intelligence in sepsis care: advances in early detection, personalized treatment, and real-time monitoring

Fang Li | Shengguo Wang | +4 authors | Chengchen Hu | Medicine, Computer Science ·

Frontiers in Medicine · 6 January 2025

TLDR The significance of this **review** lies in addressing the current limitations in sepsis **management** and highlighting how AI can overcome these hurdles, as healthcare providers can significantly enhance diagnostic accuracy, optimize treatment protocols, and improve overall patient outcomes. Expand

Predictive Modelling of Kidney Failure using Advanced Machine Learning Techniques: A Comprehensive Review

Aditya P. Pethkar | Prof. Malvika Saraf | Medicine, Computer Science ·

International Journal of Creative and Open... · 28 February 2026

TLDR Overall, AI-driven CKD prediction systems have strong potential to support clinical decision-making and enable early intervention strategies, but challenges such as limited dataset diversity, lack of external validation, model interpretability issues, and ethical concerns remain barriers to clinical adoption. Expand

Artificial Intelligence Enabled Lifestyle Medicine in Diabetes Care: A Narrative Review.

J. González-Rivas | Seyed Arsalan Seyedi | Jeffrey I. Mechanick | Medicine, Computer Science ·

American Journal of Lifestyle Medicine · 17 July 2025

TLDR **Artificial intelligence** technologies show significant potential in improving diabetes care through multiple modalities that offer scalable cost-effective solutions, improved patient outcomes, and more efficient resource distribution. Expand

Artificial Intelligence in Hypertrophic Cardiomyopathy: Advances, Challenges, and Future Directions for Personalized Risk Prediction and Management

Moiud Mohyeldin | Feras O Mohamed | +6 authors | P. Jadhav | Medicine, Computer Science ·

Cureus · 1 July 2025

TLDR A comprehensive literature search across PubMed, IEEE Xplore, Web of Science, and Scopus databases from January 2015 to January 2025 found 84 articles reporting AI applications in HCM with validated performance metrics, with particular focus on validated clinical applications. Expand

Insights into the Impact of Artificial Intelligence on Psoriasis Treatment Strategies: A Mini Review

A. Prithiviraj | M. A. Aarthi | N. Venkateswaramurthy | Medicine, Computer Science ·

Indian Dermatology Online Journal · 11 August 2025

TLDR This **review** examines the integration of AI across multiple domains of psoriasis treatment: **machine learning** algorithms for phototherapy outcome prediction, **deep learning techniques** for lesion segmentation and severity assessment, AI-enhanced remote photographic monitoring systems, and predictive modeling for response to systemic therapies and biologics. Expand

Digital Innovation in Forest Science: Applications of Artificial Intelligence, Remote Sensing and Smart Monitoring Systems for Ecosystem Conservation

Romeet Saha[1] | Pushkal Bagchie[1] | Paul Lalremsang[1] | Kirti Chamling | Rai | Mr. Pushkal Bagchie

Environmental Science, Computer Science · The Bioscan · 20 September 2025

TLDR This comprehensive **review** examines the current state, applications, challenges, and future prospects of digital **forestr**y technologies, including remote sensing, unmanned aerial vehicles (UAVs), Light Detection and Ranging systems, Internet of Things (IoT) sensors, **machine learning** algorithms, and emerging technologies such as blockchain and digital twins. Expand

Machine Learning Models for Soil Nutrient Prediction and Precision Crop Management

Deepa S | Rupa Devi | Agricultural and Food Sciences, Computer Science ·

Social Science Research Network · 2026

TLDR How AI looks to categorize soil according to the nutrients to enhance crop yield with intelligent data based strategies and effective soil' **management** to suggest appropriate crops is brought into focus. Expand
