Application of Natural Language Processing Techniques in Agile Software Project Management: A Survey

Remah Younisse · Mohammad Azzeh · Computer Science ·

International Conference on Information… · 21 November 2023

TLDR This study **reviews** the usage of natural language processing methodology in the context of Agile project effort estimation based on the contextual content of user stories in the field of effort estimation. Expand

The Investigation of Prediction on User Experience of Virtual Reality Based on Artificial Intelligence

Shijie Luo · Computer Science · Applied and Computational Engineering · 3 December 2025

TLDR This research evaluates the merging of diverse data sources for UX interpretation, contrasts the predictive performance of various AI architectures, including neural networks, random **forests**, and support vector **machines**, and considers the creation of context-aware VR systems. Expand

Deep Learning Based Forest Burned Area Detection

Ashritha Bugada · Kaushik Pillalamarri · Keyu Wan · R. Vatsavai

Environmental Science, Computer Science · IEEE International Geoscience and Remote Sensing… · 3 August 2025

TLDR A simple weighted concatenation of pre- and post-**fire** images improves accuracy by 11% on Task 1 and 26% on Task 2, and it is found that simple weighted concatenation of pre- and post-**fire** images improves accuracy by 11% on Task 1 and 26% on Task 2. Expand

AI-Driven Approaches to Wildfire Prediction and Control: Methods, Challenges, and Future Direction

Farishta Rahman · Sriram Prabhakara Rao · C. Finley · D. Flynn · Prakash Ranganathan · Hossein Salehfar

Environmental Science, Computer Science · North American Power Symposium · 26 October 2025

TLDR Recent AI and ML developments in **wildfire management** are discussed and new physics-informed neural networks for coupling subgrid **fire**-dynamics and atmosphere-dynamics are discussed, including new physics-informed neural networks for coupling subgrid **fire**-dynamics and atmosphere-dynamics. Expand

Integrating Artificial Intelligence for Enhanced Fault Detection in Power Transmission Systems: A Smart Grid Approach

Nijat Taghizade · P. Liò · Engineering, Computer Science · Computing&AI Connect · 12 December 2024

TLDR The **survey** results implied that builders of new **Artificial intelligence** systems for fault detection in electric line transmitters should aim to produce 99% accurate systems to meet the recommendations and fill the gap that this study has reported. Expand

Leveraging Artificial Intelligence for Enhanced Healthcare Diagnostics: Opportunities and Challenges

Shifan Khanday Maya Ahmed · Medicine, Computer Science ·

International Journal of Science and Research… · 5 March 2024

TLDR This **review** of literature delves into the multifaceted role of AI in diagnostics, encompassing its applications, benefits, challenges, and future directions, and explores AI's capabilities in interpreting medical images, analyzing clinical data, and predicting disease risk with remarkable accuracy and efficiency. Expand

Applications and Challenges of Artificial Intelligence in Space Missions

P. A. Oche · Gideon A. Ewa · N. Ibekwe · Engineering, Computer Science · IEEE Access · 2021

TLDR This paper **surveyed** the use of traditional AI **techniques** in various domains of space missions without delving into formal methods and addressed some crucial legal drawbacks that emanate from the reliance and use of AI in space. Expand

Artificial Intelligence in Rheumatoid Arthritis: Current Status and Future Perspectives: A State-of-the-Art Review

S. Momtazmanesh · Ali Nowroozi · N. Rezaei · Medicine, Computer Science ·

Rheumatology and Therapy · 18 July 2022

TLDR It was showed that a growing body of evidence supports the potential role of AI in revolutionizing screening, diagnosis, and **management** of patients with RA, and multiple obstacles hinder clinical applications of AI models. Expand

Machine Learning and Data Analytics for Environmental Science: A Review, Prospects and Challenges

Tharsanee Maganathan · S. Senthilkumar · V. Balakrishnan

Environmental Science, Computer Science · IOP Conference Series: Materials Science and… · 21 November 2020

TLDR The primary objective of this **survey** is to figure out the basic concepts of **Machine Learning**, **Deep Learning**, and Data Analytics and find the state-of-the-art applications in ES, and observe the impending benefits of information-centric investigation on ES. Expand

AI-Based Approaches for Analyzing EEG Signals to Identify Epileptic Seizures: A Survey

Daniel Moges Tadesse · Olyad Mulugeta Gonfa · +7 authors · Medina Fedlu Mehammed

Medicine, Computer Science · Applied Computational Intelligence and Soft… · 1 January 2026

TLDR This **review** provides a comprehensive synthesis of AI-based approaches applied to EEG signals for epileptic seizure analysis, and identifies persistent challenges such as interpatient variability, lack of standardized evaluation metrics, poor model generalization across datasets, and limited real-time deployment. Expand
