A Survey on Artificial Intelligence in Chinese Sign Language Recognition

Xianwei Jiang · S. Satapathy · Longxiang Yang · Shui-hua Wang · Yudong Zhang

Computer Science, Linguistics · The Arabian journal for science and engineering · 22 July 2020

TLDR This paper aims to cover the most recent approaches in Chinese Sign Language Recognition (CSLR) with a thorough **review** of superior methods from 2000 to 2019 in CSLR researches, and methods of classification and feature extraction, accuracy/performance evaluation, and sample size/datasets were compared. A Review: Disease Detection in Wheat Plant using Conventional and Machine Learning Algorithms

S. Paidipati · Sathvik Pothuneedi · Vijaya Nagendra Gandham · Lovish Jain · Surinder Kumar · Arpit Jain

Agricultural and Food Sciences, Computer Science · International Conferences on Contemporary... · 14 December 2022

TLDR An overall analysis of the different methods used for disease detection in plants using **artificial intelligence** based on **machine learning** and **deep learning techniques** has been analyzed. Expand

Machine Learning Approaches for Detection and Diagnosis of Parkinson’s Disease - A Review

Iqra Nissar · W. Mir · Izharuddin · T. A. Shaikh · Medicine, Computer Science ·

2021 7th International Conference on Advanced... · 19 March 2021

TLDR The **survey** work of the **machine learning techniques** and **deep learning** procedures used for Parkinson’s disease classification suggests that **artificial intelligence** is becoming a powerful **learning** tool that has much to offer to data scientists as well as neurologists. Expand

APPLICATION OF ARTIFICIAL INTELLIGENCE FOR HEALTH AND HEALTH CARE

Medicine, Computer Science · 2021

TLDR The current status of AI applications in healthcare is **survey**ed and its future is discussed, including **machine learning** methods for structured data, such as the classical support vector **machine** and neural network, and the modern **deep learning**, as well as natural language processing for unstructured data. Expand

Security Control and Data Planes of SDN: A Comprehensive Review of Traditional, AI, and MTD Approaches to Security Solutions

Abdinasir Hirsi Abdi · L. Audah · +4 authors · Ahmed Tahir · Computer Science, Engineering ·

IEEE Access · 2024

TLDR This study utilized the widely recognized STRIDE cybersecurity framework to systematically identify and evaluate the potential threats to SDN security, resulting in a comprehensive list of security challenges, and proposes future research directions aimed at addressing emerging threats in both data and control planes. Expand

Convergence of Multidimensional Sensing: A Review of AI-Enhanced Space-Division Multiplexing in Optical Fiber Sensors

R. I. Sabitu · Amin Malekmohammadi · Engineering, Physics ·

Italian National Conference on Sensors · 25 March 2026

TLDR This **review** argues that the synergistic convergence of space-division multiplexing (SDM) and **artificial intelligence** (AI) represents a paradigm shift, enabling a new generation of intelligent, high-dimensional sensing networks that are self-calibrating, adaptive, and capable of autonomous decision-making. Expand

Innovative Approaches to Modelling and Forecasting in Fisheries: A Critical Review

Mohammad Abu Baker Siddique · Ilias Ahmed · Balaram Mahalder · Shahrina Akhtar · Mohammad Mahfujul Haque · A. Ahammad

Environmental Science, Biology · Aquaculture, Fish and Fisheries · 18 January 2026

TLDR This **review** systematically examines innovative modelling and forecasting approaches in fisheries, focusing on their descriptions, applications, strengths and limitations and comparative performance based on quantitative and qualitative evaluation criteria, to guide researchers and decision-makers in selecting and developing more adaptive, accurate and actionable forecasting tools in the face of global environmental change. Expand

Research Trends in Wildland Fire Prediction Amidst Climate Change: A Comprehensive Bibliometric Analysis

Mingwei Bao · Jiahao Liu · +4 authors · Jianxiang Liu · Environmental Science · Forests ·

10 July 2024

Wildfire prediction plays a vital role in the **management** and conservation of **forest** ecosystems. By providing detailed risk assessments, it contributes to the reduction of **fire** frequency and severity,… Expand

Exploring Structural Health Monitoring of Buildings: State of the Art on Techniques and Future Directions

M. Kalai Selvi · R. Manjula Devi · +4 authors · P. Manoj Kumar

Engineering, Environmental Science · Buildings · 29 December 2025

Structural deterioration inevitably leads to defects in buildings. It is primarily caused by environmental exposure, material ageing, and long-term service conditions, whereas defects such as poor… Expand

Advancements in remote sensing technologies for accurate monitoring and management of surface water resources in Africa: an overview, limitations, and future directions

Maria Sigopi · C. Shoko · Timothy Dube · Environmental Science · Geocarto International ·

1 January 2024

Abstract This **review** presents a comprehensive examination of recent advancements in utilizing multi-date satellite data to analyze spatial and temporal variations in seasonal and inter-annual surface… Expand
