Visualization of local wind field based forest-fire’s forecast modeling for transportation planning

Jianwei Li | Lvqing Yang | Xiaowen Li | Huiru Zheng

Engineering, Environmental Science · Multimedia tools and applications · 19 March 2016

TLDR The experimental results show that the **simulation** using local wind field data of **forest fire** is more accurate in **forecast**ing the trend of **fire spread**ing, **and** can provide more favorable reference **for** making **fire** prevention **and fire** fighting decisions **and** transportation planning in **forest**. WRF-Fire: Coupled Weather–Wildland Fire Modeling with the Weather Research and Forecasting Model

J. Coen | M. Cameron | J. Michalakes | E. Patton | P. Riggan | Kara M. Yedinak

Environmental Science · 9 January 2013

AbstractA **wildland fire-behavior** module, named WRF-**Fire**, was integrated into the Weather Research and **Forecasting** (WRF) public domain numerical weather **prediction model**. The **fire** module is a surface… Expand

High-Resolution Rapid Refresh Model Data Analytics Derived on the Open Science Grid to Assist Wildland Fire Weather Assessment

Brian K. Blaylock | J. Horel | C. Galli

Environmental Science, Computer Science · Journal of Atmospheric and Oceanic Technology · 1 November 2018

TLDR This work demonstrates how the OSG has been used to compute a large set of empirical cumulative distributions from hourly gridded analyses of the High-Resolution Rapid Refresh (HRRR) **model**

run operationally by the Environmental **Model**ing Center of the National Centers **for** Environmental **Prediction**. Expand

GIS MODELING APPROACH FOR FOREST FIRE RISK ASSESSMENT AND MANAGEMENT

Shruti Kanga L. Sharma P. C. Pandey M. S. Nathawat

Environmental Science, Geography · 31 March 2014

Forest fire models are generally used in different aspects of **fire management** and are helpful in understanding and **prediction** of **fire behavior**. This helps **fire** fighters to focus on an area with… Expand

Mountains Forest Fire Spread Simulator Based on Geo-Cellular Automaton Combined With Wang Zhengfei Velocity Model

T. Sun Linghan Zhang Wangli Chen Xianxiu Tang Q. Qin

Engineering, Environmental Science ·
IEEE Journal of Selected Topics in Applied Earth… · 1 August 2013

TLDR The proposed Wang-Geophysical-CA **model** enables local managers to plan practical **fire** prevention activities in Southwest **forest** area of China as well as improve **fire management** skills, **and** will enhance the effectiveness of **fire** fighting strategies. Expand

Effects of biotic feedback and harvest management on boreal forest fire activity under climate change.

M. Krawchuk S. Cumming Environmental Science ·

Ecological Applications · 2011

TLDR It is found that climate change projected with **fire** weather indices calculated from the Canadian Regional Climate **Model** increased **fire** activity, as expected, **and simulation**s established evidence that the magnitude of regional increase in **fire** was sufficient to generate negative feedback to subsequent **fire** activity. A GIS-supported model for the simulation of the spatial structure of wildland fire, Cass Basin, New Zealand

G. Perry A. Sparrow I. Owens Environmental Science, Geography ·

1 September 1999

Summary 1. The behaviour of **wildland fire** in spatially heterogeneous landscapes was simulated using a **model** (PYROCART) that integrates the Rothermel **fire spread model** and a geographic… Expand

A Strategy to Elaborate Forest Fire Spread Models for Management Tools Including a Computer Time-Saving Algorithm

Albert Simeoni P. Santoni J. Balbi

Environmental Science, Computer Science · 1 January 2002

TLDR A time-saving algorithm was developed that solves the semiphysical **model** in the **fire** vicinity while providing accurate **predictions**, the last step of the proposed strategy to elaborate **forest fire spread models** for **management** tools, which starts from a complete physical **model** to reach a discrete **model** to be integrated into a simulator. Expand

The use of the GIS into the Forest Fire prediction . The Simulation Model

A. Saidi A. Missoumi Environmental Science, Geography · 2002

The mastery of strategies of **forests fire**-fighting passes compulsorily by deep knowledge of **forest fire** phenomenon. One of the efficient means of apprehension of the **forest fire**, is to dispose of a… Expand

An approach to operational forest fire growth predictions for Canada

K. R. Anderson P. Englefield J. Little G. Reuter

Environmental Science · 2009

This paper presents an operational approach to predicting **fire** growth for **wildland fires** in Canada. The approach addresses data assimilation to provide **predictions** in a timely and efficient manner.… Expand
