Minimum travel time algorithm for fire behavior and burn probability in a parallel computing environment

K. Kalabokidis | Nikolaos Athanasis | Palaiologos Palaiologou | A. Ager | M. Finney | C. Vasilakos

Environmental Science, Computer Science · 24 October 2014

TLDR By integrating MTT into the AEGIS platform, the **fire**fighting **and** civil protection agencies will gain great assistance to **or**ganize better **and** more reliable plans **for fire** confrontation. Expand

Atmospheric turbulence, meteorological modeling and aerodynamics

P. Lang | Frank S. Lombargo | Environmental Science, Engineering · 2010

Preface Atmospheric Turbulence: **Prediction**, Measurement, and Effects. Climatology of the Arctic Planetary Boundary Layer Nonequilibrium Thermodynamic Theory Of The Atmospheric Turbulence Generalized… Expand

Disturbances and the sustainability of long-term site productivity in lodgepole pine forests in the central interior of British Columbia — an ecosystem modeling approach

X. Weia | J. P. Kimminsb | G. Zhouc | Environmental Science · 2003

The ecosystem-**management model FORECAST** was used to compare some ecological impacts of natural disturbance (**wildfire**) and timber harvesting. The scientific objective of the study was to assess… Expand

Optimization of the Resources Management in Fighting Wildfires

S. Martín-Fernández Eugenio Martínez-Falero J. M. Pérez-González

Engineering, Environmental Science · Environmental Management · 1 September 2002

TLDR A method of optimizing the performance of **wildfire** fighting resources such that losses are kept to a minimum **and** this application to the Northwest **Forest** of Madrid (Spain) allowed us to check that it is a helpful tool in the decision-making process. Expand

J 2 . 4 SIMULATION OF WILDFIRE INCIDENTS USING COUPLED ATMOSPHERE-FIRE MODELING

J. Coen Environmental Science · 2003

Numerical **modeling** of **fires** has progressed over the past decade. In addition to semi-empirically based **fire spread models** that have led to practical in-the-field tools, other tools built to… Expand

FireDST: Fire Impact and Risk Evaluation Decision Support Tool - model description

I. French B. Cechet Tina Yang A. Sanabria

Environmental Science, Engineering · 2013

Australia needs to develop and use sophisticated **fire modeling** techniques as an aid in the prevention and mitigation of **bushfires** (COAG 2002). This was reinforced by the recommendations from the… Expand

Expertise in the Management of Bushfires: Training and Decision Support

S. Lewandowsky J. Dunn K. Kirsner M. Randell

Environmental Science · 1 November 1997

Bushfires have been a common occurrence across Australia for millennia. With the growing expansion of urban areas into surrounding bushland, **fires** pose an increasing threat to life and property. The… Expand

Automated Fire and Flood Hazard Protection System

K. Kalabokidis G. Kallos +4 authors C. Vasilakos

Environmental Science, Engineering · 2005

AUTO-HAZARD PRO, a European Union-funded research project, integrates real-time and on-line **fire** and flood hazard **management** schemes into a GIS-type platform. The system runs on an operational mode… Expand

A Hierarchical LSTM-Based Vehicle Trajectory Prediction Method Considering Interaction Information

Haitao Min Xiaoyong Xiong Pengyu Wang Zhaopu Zhang

Computer Science, Engineering · Automotive Innovation · 4 January 2024

TLDR A hierarchical LSTM-based method **for** vehicle **trajectory prediction** that incorporates the interactional information of neighboring vehicle movements into the **model** input **and** has a lower **prediction** error compared to the integral LSTM **model**. Expand

Fire regimes of the Southern Appalachians may radically shift under climate change

Zachary J. Robbins E. L. Loudermilk Tina G. Mozelewski Kate Jones R. Scheller

Fire Ecology · 12 January 2024

Antecedentes El incremento de la sequía debido al Cambio Climático alterará los regímenes de fuego en paisajes de bosques mésicos, donde la humedad del combustible limita típicamente la propagación… Expand
