## Fire regimes of the Southern Appalachians may radically shift under climate change

Zachary J. Robbins | E. L. Loudermilk | Tina G. Mozelewski | Kate Jones | R. Scheller

Fire Ecology · 12 January 2024

Antecedentes El incremento de la sequía debido al Cambio Climático alterará los regímenes de fuego en paisajes de bosques mésicos, donde la humedad del combustible limita típicamente la propagación… Expand

## A Bayesian model for predicting monthly fire frequency in Kenya

Levi Orero | E. Omondi | Bernard Omolo | Environmental Science ·

PLoS ONE · 25 January 2024

This study presents a comprehensive analysis of historical **fire** and climatic data to estimate the monthly frequency of vegetation **fires** in Kenya. This work introduces a statistical **model** that… Expand

## Soil organic matter turnover is governed by accessibility not recalcitrance

J. Dungait | D. Hopkins | A. Gregory | A. Whitmore

Environmental Science · 1 June 2012

Mechanisms to mitigate global climate change by sequestering carbon (C) in different ‘sinks' have been proposed as at least temporary measures. Of the major global C pools, terrestrial ecosystems… Expand

## Simulating multiple scenarios of land use/cover change using a coupled model to capture ecological and economic effects

Yuechen Li | Xian Liu | Yue Wang | Zhiming He

Environmental Science, Economics · **Land** Degradation & Development · 15 February 2023

The conflict between the demands of ecological protection and economic development is increasingly prominent. **Land** use change is sensitive to whether economic or ecological profits dominate, and… Expand

## A New Product Growth for Model Consumer Durables

F. Bass Business, Economics · Management Sciences · 1 December 2004

TLDR A growth **model for** the timing of initial purchase of new products is developed **and** tested empirically against data **for** eleven consumer durables, **and** a long-range **forecast** is developed **for** the sales of color television sets. Expand

## Monsoons: Processes, predictability, and the prospects for prediction

P. Webster | V. Magaña | +4 authors | T. Yasunari

Environmental Science, Geography · 29 June 1998

The Tropical Ocean-Global Atmosphere (TOGA) program sought to determine the predictability of the coupled ocean-atmosphere system. The World Climate Research Programme's (WCRP) Global… Expand

## Using Bayesian Model Averaging to Calibrate Forecast Ensembles

A. Raftery | T. Gneiting | F. Balabdaoui | M. Polakowski

Environmental Science, Mathematics · 1 May 2005

Ensembles used for probabilistic weather **forecasting** often exhibit a **spread**-error correlation, but they tend to be underdispersive. This paper proposes a statistical method for postprocessing… Expand

## Sub-Seasonal Forecasting With a Large Ensemble of Deep-Learning Weather Prediction Models

Jonathan A. Weyn D. Durran R. Caruana

Nathaniel Cresswell-Clay

Computer Science, Environmental Science ·
Journal of Advances in Modeling Earth Systems · 9 February 2021

TLDR The continuous ranked probability score (CRPS) and the ranked probability skill score (RPSS) show that the DLWP ensemble is only modestly inferior in performance to the European Center for Medium Range Weather Forecasts (ECMWF) S2S ensemble over land at lead times of 4 and 5–6 weeks. Expand

## Graph-Based Spatial-Temporal Convolutional Network for Vehicle Trajectory Prediction in Autonomous Driving

Zihao Sheng Yunwen Xu Shibei Xue Dewei Li

Computer Science, Engineering ·
IEEE transactions on intelligent transportation… · 27 September 2021

TLDR A graph-based spatial-temporal convolutional network is proposed to predict future trajectory distributions of all neighbor vehicles using past trajectories, and a weighted adjacency matrix to describe the intensities of mutual influence between vehicles is proposed. Expand
