The Generation and Forecast of Extreme Winds during the Origin and Progression of the 2017 Tubbs Fire

J. Coen | W. Schroeder | B. Quayle | Environmental Science ·

Atmosphere · 24 November 2018

On 8–9 October 2017, fourteen **wildfires** developed rapidly during a strong Diablo wind event in northern California including the Tubbs **Fire**, which travelled over 19 km in 3.25 h. Here, we applied the… Expand

Validity of parameter optimization in improving MJO simulation and prediction using the sub-seasonal to seasonal forecast model of Beijing Climate Center

Xiangwen Liu | Weijing Li | +6 authors | Weihua Jie

Environmental Science, Physics · Climate Dynamics · 25 July 2018

Using the sub-seasonal to seasonal **forecast model** of Beijing Climate Center, several key physical parameters are perturbed by the Latin hypercube sampling method to find a better configuration for… Expand

Decadal prediction skill in the GEOS-5 forecast system

Y. Ham | M. Rienecker | +5 authors | S. Schubert

Environmental Science, Physics · Climate Dynamics · 2013

A suite of decadal **predictions** has been conducted with the NASA Global **Modeling** and Assimilation Office’s (GMAO’s) GEOS-5 Atmosphere–Ocean general circulation **model**. The hind casts are initialized… Expand

Application of the CERES-Wheat model for within-season prediction of winter wheat yield in the United Kingdom

M. Bannayan N. Crout G. Hoogenboom

Agricultural and Food Sciences · 2003

Mechanistic crop growth **models** have many potential uses for crop **management**. These **models** can aid in preseason and within-season **management** decisions for cultural practices such as fertilizer and… Expand

Seasonal weather and climate prediction over area burned in grasslands of northeast China

A. Shabbir Jiquan Zhang +4 authors Carlos F. Valencia

Environmental Science · Scientific Reports · 17 November 2020

TLDR This framework addresses interactions among multiple drivers to explain **fire and** ecosystem responses in grass**lands**, **and** how these may be understood **and** prioritized in different empirical contexts needed to formulate effective **fire management** policies. Expand

Generalized Approach to Landscape-Wide Seasonal Forecasting with Temperature-Driven Simulation Models

J. Régnière Environmental Science · 1 October 1996

TLDR A generalized approach is proposed that consists of a temperature-driven **simulation model** that uses data from a limited number of strategically located points in the **land**scape as its input, **and** projections of features in **model** output are obtained by algebraic transformation of a digital elevation **model** of the **land**scape. Expand

Identifying hotspots for plant invasions and forecasting focal points of further spread

I. Ibáñez J. Silander Jenica M. Allen Sarah A. Treanor A. Wilson

Environmental Science, Biology · 1 December 2009

TLDR This work aimed to develop statistical **models** that identify hotspots of invasive plant species **and** evaluate the conditions that give rise to successful populations of invasive species, using a spatially explicit generalized linear **model** within a hierarchical Bayesian framework. Expand

Integrating system dynamics and fuzzy logic modelling for construction risk management

F. Nasirzadeh A. Afshar M. Khanzadi S. Howick Engineering •

1 November 2008

The complex structure of construction project risks arises from their internal and external interactions with their dynamic nature throughout the life cycle of the project. A system **dynamics** (SD)… Expand

Effect of weather forecast errors on fire growth model projections

T. Penman D. Ababei +4 authors J. Hilton

Environmental Science • 31 August 2020

Fire management agencies use **fire** behaviour **simulation** tools to predict the potential **spread** of a **fire** in both risk planning and operationally during **wildfires**. These **models** are generally based on… Expand

Evaluation of forecasts by accuracy and spread in the MiKlip decadal climate prediction system

C. Kadow S. Illing +4 authors U. Cubasch

Environmental Science, Physics • 21 December 2016

We present the evaluation of temperature and precipitation **forecasts** obtained with the MiKlip decadal climate **prediction** system. These decadal hindcast experiments are verified with respect to the… Expand
