Evaluation of forecasts by accuracy and spread in the MiKlip decadal climate prediction system

C. Kadow | S. Illing | +4 authors | U. Cubasch

Environmental Science, Physics • 21 December 2016

We present the evaluation of temperature and precipitation **forecasts** obtained with the MiKlip decadal climate **prediction** system. These decadal hindcast experiments are verified with respect to the… Expand

A simulation model of the population dynamics and evolution of myxomatosis.

G. Dwyer | S. Levin | L. Buttel | Environmental Science, Biology • 1 February 1990

TLDR Control of the rabbit by the virus is likely **for** the near future, but that until the authors understand the genetics of resistance in the rabbit **and** the rela- tionship between resistance **and** virulence **for** different grades of virulence, they cannot make a useful **prediction** of the long-term state of this system. Expand

Mesoscale modeling of smoke transport from equatorial Southeast Asian Maritime Continent to the Philippines: First comparison of ensemble analysis with in situ observations

C. Ge | Jun Wang | J. Reid | D. Posselt | P. Xian | E. Hyer

Environmental Science • 19 May 2017

Atmospheric transport of smoke from equatorial Southeast Asian Maritime Continent (Indonesia, Singapore, and Malaysia) to the Philippines was recently verified by the first-ever measurement of… Expand

CBM-CFS 3 : A model of carbon-dynamics in forestry and land-use change implementing IPCC standards

W. A. Kurza | C. C. Dymonda | +9 authors | M. J. Appsa

Environmental Science · 2009

The scientific community, **forest** managers, environmental organizations, carbon-offset trading systems and policy-makers require tools to account for **forest** carbon stocks and carbon stock changes. In… Expand

Simulation of ENSO in the New NCEP Coupled Forecast System Model (CFS03)

Wanqiu Wang | S. Saha | H. Pan | S. Nadiga | G. White

Environmental Science · 1 June 2005

Abstract A new global coupled atmosphere–ocean **forecast** system **model** (CFS03) has recently been developed at the National Centers for Environmental **Prediction** (NCEP). The new coupled **model** consists of… Expand

Long-term growth and water balance predictions for a mountain ash (Eucalyptus regnans) forest catchment subject to clear-felling and regeneration.

R. Vertessy | T. Hatton | R. Benyon | W.R Dawes

Environmental Science · Tree Physiology · 1996

TLDR It is argued that there is a useful role **for** physically based ecohydrological **models** in the **management** of mountain ash **forest** catchments that cannot be satisfied by simple empirical approaches. Expand

Assessing ecological uncertainty and simulation model sensitivity to evaluate an invasive plant species' potential impacts to the landscape

C. Jarnevich | N. Young | Catherine Cullinane Thomas | P. Grissom | D. Backer | L. Frid

Environmental Science, Biology · Scientific Reports · 4 November 2020

TLDR A state-**and**-transition **simulation model** tied to a **fire behavior model** is developed to simulate the **spread** of buffelgrass in Saguaro National Park, AZ, USA over a 30-year period **and** identified uncertainty

inbuffelgrass patch infill rates as a key area for research to improve forecasts. Expand

Simulating boundary-layer rolls with a numerical weather prediction model

W. Thurston R. Fawcett K. Tory J. Kepert

Environmental Science · 2016

Boundary-layer rolls have an impact on **bushfires**, pollution dispersion, the triggering of extreme convective weather events, the air–sea interaction and intensification of tropical cyclones and… Expand

Approximate Solutions of a Dynamic Forecast-Inventory Model

Tetsuo Iida Paul H. Zipkin Business, Computer Science · Manufacturing & Service Operations Management · 2006

TLDR A dynamic **forecast**-inventory **model** with **forecast** updates, based on the martingale **model** of **forecast** evolution, which derives some characteristics of optimal policies **and** also develops a computational approach to obtain approximate solutions. Expand

An analysis of seasonal predictability in coupled model forecasts

P. Peng A. Kumar W. Wang Environmental Science, Physics · 1 February 2011

In the recent decade, operational seasonal **prediction** systems based on initialized coupled **models** have been developed. An analysis of how the predictability of seasonal means in the initialized… Expand
