About 2,600 results for “review wildfire spread prediction”

Fields of Study | Date Range | Has PDF | Author | Journals & Conferences | More Filters | Filters | Sort by Relevance

Wildfire Prediction: Handling Uncertainties Using Integrated Bayesian Networks and Fuzzy Logic

M. Naderpour | H. M. Rizeei | Fahimeh Ramezani | Environmental Science, Engineering ·

IEEE International Conference on Fuzzy Systems · 1 July 2020

TLDR A **wildfire** probability **prediction** method considering the capabilities of Bayesian networks and fuzzy logic that can handle uncertainties and update probabilities in response to the availability of new data is developed. Expand

Statistical Modeling for the Prediction of Infectious Disease Dissemination With Special Reference to COVID-19 Spread

S. K. Yadav | Y. Akhter | Medicine, Mathematics · Frontiers in Public Health · 16 June 2021

TLDR The results of recent statistical modeling efforts to predict the course of COVID-19 **spread** are **reviewed** and how to improve the existing modeling methods, the use of fuzzy variables, and detection of fraud in the available data are **reviewed**. Expand

Agent-based modelling for wildfire behaviour prediction

Debora Voltolina | S. Sterlacchini | Giacomo Cappellini | M. Zazzeri | T. Apuani

Environmental Science, Computer Science · 9 March 2020

TLDR The developed **wildfire** behaviour model has provided accurate **predictions** and could represent a promising tool in prioritizing firefighting interventions in near-real time if compared with results from other well-known **wildfire** simulation toolset and software. Expand

A cellular automata model for forest fire spread prediction: The case of the wildfire that swept through Spetses Island in 1990

A. Alexandridis | D. Vakalis | C. Siettos | G. Bafas | Environmental Science ·

Applied Mathematics and Computation · 1 October 2008

189 | Publisher | Save | Cite

Challenges and Opportunities in Remote Sensing-Based Fuel Load Estimation for Wildfire Behavior and Management: A Comprehensive Review

Arnick Abdollahi | Marta Yebra | Environmental Science · Remote Sensing · 25 January 2025

Fuel load is a crucial input in **wildfire** behavior models and a key parameter for the assessment of fire severity, fire flame length, and fuel consumption. Therefore, **wildfire** managers will benefit… Expand

Influencing factors, prediction and prevention of depression in college students: A literature review

Xinqiao Liu | Yu Guo | Wen-jie Zhang | Wenjuan Gao | Psychology, Medicine ·

World Journal of Psychiatry · 19 July 2022

TLDR It is insisted that the technology of identification, **prediction**, and prevention of depression among college students based on big data platforms will be extensively used in the future. Expand

A Systematic Review of Models for Fire Spread in Wildfires by Spotting

Edna Cardoso D. X. Viegas António Gameiro Lopes Environmental Science · Fire ·

3 October 2025

Fire spotting (FS), the process by which firebrands are lofted, transported, and ignite new fires ahead of the main flame front, plays a critical role in escalating extreme **wildfire** events. This… Expand

Wildfire Detection With Deep Learning—A Case Study for the CICLOPE Project

Afonso M. Gonçalves Tomás Brandão João C. Ferreira

Environmental Science, Computer Science · IEEE Access · 2024

TLDR A solution based on a Dual-Channel CNN that can be deployed as a secondary **prediction** confirmation layer to further refine the CICLOPE automatic smoke detection system is proposed, achieving an accuracy of 99.7% and a low false alarm rate when re-examining the alarms produced by the CICLOPE surveillance system. Expand

Abstract Submitted for the DFD20 Meeting of The American Physical Society Ensemble Predictions of Wildfire Spread Through TPU- Compatible TensorFlow Acceleration1

M. Bonanni M. Bonanni Environmental Science, Physics · 2020

Submitted for the DFD20 Meeting of The American Physical Society Ensemble **Predictions** of **Wildfire Spread** Through TPUCompatible TensorFlow Acceleration1 MATTHEW BONANNI, MATTHIAS IHME, Stanford… Expand

Firefighting Drone Configuration and Scheduling for Wildfire Based on Loss Estimation and Minimization

Rong-Yu Wu Xi-Cheng Xie Yujun Zheng Environmental Science, Engineering · Drones ·

10 January 2024

Drones have been increasingly used in firefighting to improve the response speed and reduce the dangers to human firefighters. However, few studies simultaneously consider fire **spread prediction**,… Expand
