Scientific sinkhole: estimating the cost of peer review based on survey data with snowball sampling

A. LeBlanc | Joel D. Barnes | T. Saunders | M. Tremblay | J. Chaput | Economics ·

Research Integrity and Peer Review · 24 April 2023

TLDR The cost of peer **review** represents an important financial piece of scientific publishing and journals should develop methods to compensate **reviewers** for their time and improve transparency while maintaining the integrity of the peer-**review** process. Expand

A Scoping Review of Nurses' Contributions to Health-Related, Wildfire Research

T. Marko | Micah Suarez | Elitza Todorova | C. Mark | P. Julie | Environmental Science, Medicine ·

Annual Review of Nursing Research · 23 December 2019

TLDR This scoping **review** examines publications related to **wildfires** and health in order to explore the ways in which nursing science contributes to research on the health effects of **wildfires** and strategies to decrease exposure to **wildfire** and/or **wildfire** smoke. Expand

Too much, too soon? A review of the effects of increasing wildfire frequency on tree mortality and regeneration in temperate eucalypt forests

T. Fairman | C. Nitschke | L. Bennett | Environmental Science · 25 August 2016

In temperate Australia, **wildfires** are predicted to be more frequent and severe under climate change. This could lead to marked changes in tree mortality and regeneration in the region’s predominant… Expand

Safeguarding large language models: a survey

Yi Dong | Ronghui Mu | +9 authors | Xiaowei Huang | Computer Science ·

Artificial Intelligence Review · 3 June 2024

TLDR The paper elucidates the current landscape of safeguarding mechanisms that major LLM service providers and the open-source community employ and **reviews** techniques to evaluate, analyze, and enhance some (un)desirable properties that a guardrail might want to enforce. Expand

Domain generalization through meta-learning: a survey

Arsham Gholamzadeh Khoee | Yinan Yu | R. Feldt | Computer Science ·

Artificial Intelligence Review · 3 April 2024

TLDR A novel taxonomy based on the feature extraction strategy and the classifier learning methodology is introduced and a decision graph is presented to assist readers in navigating the taxonomy based on data availability and domain shifts, enabling them to select and develop a proper model tailored to their specific problem requirements. Expand

Attention-based transformer models for image captioning across languages: An in-depth survey and evaluation

Israa Albadarneh | Bassam H. Hammo | Omar S. Al-Kadi | Computer Science, Linguistics ·

Computer Science Review · 3 June 2025

TLDR This survey reviews attention-based image captioning models, categorizing them into transformer-based, deep learning-based, and hybrid approaches, and identifies key limitations in current models, including semantic inconsistencies, data scarcity in non-English languages, and limitations in reasoning ability. Expand

Health Effects of Wildfire Smoke Exposure.

Carlos F. Gould | S. Heft-Neal | M. Prunicki | Juan Aguilera | M. Burke | Kari C. Nadeau

Environmental Science, Medicine · Annual Review of Medicine · 22 September 2023

TLDR A systematic review and meta-analysis of the health effects of wildfire smoke exposure is conducted, finding positive impacts on all-cause mortality and respiratory hospitalizations but less consistent evidence on cardiovascular morbidity. Expand

Explainable AI and vision transformers for detection and classification of brain tumor: a comprehensive survey

Khaid M. Hosny | Mahmoud A. Mohammed | Medicine, Computer Science ·

Artificial Intelligence Review · 4 June 2025

TLDR This survey reviews and contrasts the state-of-the-art deep learning diagnostic techniques that utilized brain tumor datasets such as Figshare and BraTS and discusses the challenges in deep learning-based approaches related to brain tumor detection, including data scarcity and model interpretability, and outlines future directions. Expand

Parameter-efficient fine-tuning in large language models: a survey of methodologies

Luping Wang | Sheng Chen | +4 authors | Fei Yang | Computer Science, Linguistics ·

Artificial Intelligence Review · 24 October 2024

TLDR This review mainly introduces the preliminary knowledge of PEFT, the core ideas and principles of various PEFT algorithms, the applications of PEFT, and potential future research directions so that interested parties can quickly grasp the PEFT methodology, thereby accelerating its development and innovation. Expand
