Domain generalization for semantic segmentation: a survey

T. Rafi · Ratul Mahjabin · Emon Ghosh · Young-Woong Ko · Jeong-Gun Lee · Computer Science ·

Artificial Intelligence Review · 12 August 2024

TLDR This **survey** presents a comprehensive summary of recent works related to domain generalization in semantic segmentation, which establishes the importance of generalizing to new environments of segmentation models. Expand

Three-way decisions in generalized intuitionistic fuzzy environments: survey and challenges

Juanjuan Ding · Chao Zhang · Deyu Li · Jianming Zhan · Wentao Li · Yiyu Yao

Mathematics, Computer Science · Artificial Intelligence Review · 1 February 2024

TLDR A comprehensive and insightful **review** of the latest research progress on 3WD methods in generalized IF environments is offered, which can provide guidance for scholars and engineers in the intelligent decision-making field with situations characterized by various uncertainties. Expand

A survey of uncertainty in deep neural networks

J. Gawlikowski · Cedrique Rovile Njieutcheu Tassi · +11 authors · Xiaoxiang Zhu

Computer Science · Artificial Intelligence Review · 7 July 2021

TLDR This work gives a comprehensive overview of uncertainty estimation in neural networks, **reviews** recent advances in the field, highlights current challenges, and identifies potential research opportunities, and a comprehensive introduction to the most crucial sources of uncertainty is given. Expand

Analysis of Wildfire Visualization Systems for Research and Training: Are They Up for the Challenge of the Current State of Wildfires?

C. A. T. Cortes · Susanne Thurow · +4 authors · D. D. Favero · Environmental Science ·

IEEE Transactions on Visualization and Computer... · 17 March 2023

Wildfires affect many regions across the world. The accelerated progression of global warming has amplified their frequency and scale, deepening their impact on human life, the economy, and the... Expand

Deciphering Arabic question: a dedicated survey on Arabic question analysis methods, challenges, limitations and future pathways

Mariam Essam · Mohanad A. Deif · Rania Elgohary · Computer Science, Linguistics ·

Artificial Intelligence Review · 13 August 2024

TLDR A comprehensive **review** of different research on question analysis highlights not only the diversified potential for the capabilities of NLP techniques in refining question analysis but also the potential way of great promises for further enhancements and improvements in this progressive domain. Expand

A survey of safety and trustworthiness of large language models through the lens of verification and validation

Xiaowei Huang Wenjie Ruan +14 authors Mustafa A. Mustafa Computer Science ·

Artificial Intelligence Review · 19 May 2023

TLDR If and how the Verification and Validation techniques, which have been widely developed for traditional software and deep learning models as independent processes to check the alignment of their implementations against the specifications, can be integrated and further extended throughout the lifecycle of the LLMs to provide rigorous analysis to the safety and trustworthiness of LLMs and their applications is considered. Expand

A comprehensive survey of loss functions and metrics in deep learning

Juan R. Terven Diana-Margarita Córdova-Esparza J. Romero-González

Alfonso Ramirez-Pedraza E. A. Chavez-Urbiola

Computer Science, Mathematics · Artificial Intelligence Review · 5 July 2023

TLDR A unified framework for understanding how losses and metrics align with different learning objectives is presented, and new insights into specialized metrics used to evaluate modern applications like retrieval-augmented generation are revealed. Expand

Deriving Priors for Bayesian Prediction of Daily Response Propensity in Responsive Survey Design: Historical Data Analysis Versus Literature Review.

Brady T. West J. Wagner Stephanie Coffey M. Elliott Mathematics ·

Journal of Survey Statistics and Methodology · 26 October 2021

Responsive **survey** design (RSD) aims to increase the efficiency of **survey** data collection via live monitoring of paradata and the introduction of protocol changes when **survey** errors and increased… Expand

Attention-based graph neural networks: a survey

Chengcheng Sun Chenhao Li +4 authors Zhixi Wang Computer Science ·

Artificial Intelligence Review · 21 August 2023

TLDR A novel two-level taxonomy for attention-based GNNs is proposed from the perspective of development history and architectural perspectives and three developmental stages are revealed, including graph recurrent attention networks, graph Attention networks, and graph transformers. Expand
