Wildfire and prescribed burning impacts on air quality in the United States

Daniel A. Jaffe · Susan M. O’Neill · +4 authors · Ana G. Rappold · Environmental Science ·

Journal of the Air and Waste Management… · 2 April 2020

ABSTRACT Air quality impacts from **wildfires** have been dramatic in recent years, with millions of people exposed to elevated and sometimes hazardous fine particulate matter (PM 2.5) concentrations… Expand

Review of Distributed Quantum Computing. From single QPU to High Performance Quantum Computing

David Barral · F. J. Cardama · +10 authors · Andrés Gómez · Computer Science, Physics ·

Computer Science **Review** · 1 April 2024

TLDR A comprehensive **survey** of the current state of the art in the distributed quantum computing field, exploring its foundational principles, landscape of achievements, challenges, and promising directions for further research is presented. Expand

Place recognition meet multiple modalities: a comprehensive review, current challenges and future development

Zhenyu Li · Tianyi Shang · Pengjie Xu · Zhaojun Deng · Computer Science, Engineering ·

Artificial Intelligence **Review** · 30 August 2025

TLDR This **survey** comprehensively **reviews** recent advancements in place recognition, emphasizing three representative methodological paradigms: Convolutional Neural Network (CNN)-based approaches, Transformer-based frameworks, and cross-modal strategies. Expand

Single sample face recognition using deep learning: a survey

Vivek Tomar · Nitin Kumar · Ayush Srivastava · Computer Science · Artificial Intelligence **Review** ·

15 July 2023

TLDR A comprehensive **survey** of SSFR using deep learning is presented and a novel taxonomy is proposed which broadly divide these methods into three categories viz. virtual sample generation, feature-based, and hybrid methods. Expand

A survey of intelligent transmission line inspection based on unmanned aerial vehicle

By clicking accept or continuing to use the site, you agree to the terms outlined in our Privacy Policy, Terms of Service, and Dataset License

ACCEPT & CONTINUE

TLDR A **survey** on the intelligent transmission line inspection based on unmanned aerial vehicle (UAV) and three key issues, i.e., path planning of UAV, trajectory tracking, and fault detection and diagnosis are presented. Expand

182 Springer Nature Save Cite

A survey of deep learning techniques for machine reading comprehension

Samreen Kazi S. Khoja Ali Daud Computer Science, Linguistics · Artificial Intelligence **Review** · 15 September 2023

TLDR This study utilizes quantitative analysis to conduct a systematic literature **review** (SLR) with the aim of comprehending the recent global shift in MRC research from high- resource languages (HRL) to low-resource languages. Expand

25 Springer Nature Save Cite

What is the Future of Survey-Based Data Collection for Local Government Research? Trends, Strategies, and Recommendations

Rachel M. Krause S. M. Fatemi Le Anh Nguyen Long Gwen Arnold Sarah L. Hofmeyer

Political Science · Urban Affairs **Review** · 29 May 2023

Surveys are an important vehicle for advancing research on urban policy and governance. The introduction of online tools eased **survey**-based data collection, making it cheaper and easier to obtain… Expand

Recent advances in deep learning based dialogue systems: a systematic survey

Jinjie Ni Tom Young Vlad Pandelea Fuzhao Xue V. Adiga E. Cambria

Computer Science, Linguistics · Artificial Intelligence **Review** · 10 May 2021

TLDR This **survey** is the most comprehensive and up-to-date one at present for deep learning based dialogue systems, extensively covering the popular techniques. Expand
