About 390,000 results for “survey review wildfire”

Fields of Study | Date Range | Has PDF | Author | Journals & Conferences | More Filters | Filters | Sort by Relevance

A survey of transfer learning for machinery diagnostics and prognostics

Siya Yao · Q. Kang · Mengchu Zhou · M. Rawa · A. Abusorrah · Engineering, Computer Science ·

Artificial Intelligence Review · 16 August 2022

TLDR This **survey** presents a systematic **review** of recent research with clear explanations as well as in-depth insights, thereby helping readers better understand transfer learning for machinery diagnostics and prognostics. Expand

Blockchain and Deep Q-Learning for Trusted Cloud-Enabled Drone Network in Smart Forestry: A Survey

Guma Ali · Wamusi Robert · +4 authors · Ayodeji Olalekan Salau

Environmental Science, Computer Science · Babylonian Journal of Networking · 14 December 2025

TLDR Together, Blockchain and DQL create a resilient, scalable architecture that supports secure, real-time, and intelligent forest monitoring that lays the groundwork for developing autonomous and trustworthy drone networks that promote sustainable and climate-smart forestry management. Expand

Application of machine learning methods in fault detection and classification of power transmission lines: a survey

F. Shakiba · S. Azizi · Mengchu Zhou · A. Abusorrah · Engineering, Computer Science ·

Artificial Intelligence Review · 13 November 2022

TLDR This paper presents a comprehensive **review** of various machine learning methodologies including naive Bayesian classifier, decision tree, random forest, k-nearest neighbor, and support vector machine as well as artificial neural networks that have been used to detect, classify, and locate faults in transmission lines. Expand

151 · Springer Nature · Save · Cite

A Survey of Deep Learning-based Object Detection Methods and Datasets for Overhead Imagery

Junhyung Kang · Shahroz Tariq · Han Oh · Simon S. Woo

Computer Science, Environmental Science · IEEE Access · 2022

TLDR This **survey** paper provides a comprehensive overview and comparative **review**s on the most up-to-date deep learning-based object detection in overhead images and the introduction of overhead datasets that have not been comprehensively **survey**ed before. Expand

A comprehensive survey and analysis of generative models in machine learning

GM Harshvardhan · M. Gourisaria · M. Pandey · S. Rautaray · Computer Science ·

Computer Science Review · 1 November 2020

TLDR This paper **review** and analyse critically all the generative models, namely Gaussian Mixture Models (GMM), Hidden Markov Models (HMM), Latent Dirichlet Allocation (LDA), Restricted Boltzmann Machines (RBM), Deep Belief Networks (DBN), Deep Boltz Mann Machines (DBM), and GANs, to provide the reader some insights on which generative model to pick from while dealing with a problem. Expand

A Comprehensive Survey on the Multiple Travelling Salesman Problem: Applications, Approaches and Taxonomy

O. Cheikhrouhou I. Khoufi Engineering, Computer Science · Computer Science Review · 25 February 2021

TLDR This **survey** focuses on MTSP's recent contributions to both classical vehicles/robots and unmanned aerial vehicles, and highlights the approaches applied to solve the MTSP as well as its application domains. Expand

Reinforcement learning applications in environmental sustainability: a review

Maddalena Zuccotto A. Castellini Davide La Torre L. Mola A. Farinelli

Environmental Science, Computer Science · Artificial Intelligence Review · 12 March 2024

TLDR This work **surveys** the literature to identify the main applications of reinforcement learning in environmental sustainability and the predominant methods employed to address these challenges, and provides practitioners with a clear overview of the main challenges and open problems that should be tackled in future research. Expand

Deep Neuro-Fuzzy System application trends, challenges, and future perspectives: a systematic survey

Noureen Talpur S. J. Abdulkadir Hitham Alhussian M. H. Hasan Norshakirah Aziz A. Bamhdi

Computer Science · Artificial Intelligence Review · 13 April 2022

TLDR The analysis made in this **review** proves that DNFS-based research is actively growing with a substantial implementation and application scope in the future, allowing for more effective advancement in techniques and processes. Expand

Optimization models for disaster response operations: a literature review

Afshin Kamyabniya Antoine Sauré F. Salman N. Bénichou Jonathan Patrick

Environmental Science, Engineering · OR spectrum · 10 March 2024

Disaster operations management (DOM) seeks to mitigate the harmful impact of natural disasters on individuals, society, infrastructure, economic activities, and the environment. Due to the increasing… Expand
