About 390,000 results for “survey review wildfire”

Fields of Study | Date Range | Has PDF | Author | Journals & Conferences | More Filters | Filters | Sort by Relevance

Deep emotion recognition in textual conversations: a survey

Patrícia Pereira · Helena Moniz · Joao Paulo Carvalho · Computer Science, Linguistics · Artificial Intelligence Review · 16 November 2022

TLDR The advantage of leveraging techniques to address unbalanced data, the exploration of mixed emotions, and the benefits of incorporating annotation subjectivity in the learning phase are emphasized. Expand

39 [PDF] Springer Nature Save Cite

Persistent-homology-based machine learning: a survey and a comparative study

Chi Seng Pun · S. Lee · Kelin Xia · Computer Science, Mathematics · Artificial Intelligence Review · 19 February 2022

TLDR This paper provides a systematical **review** of PH and PH-based supervised and unsupervised models from a computational perspective, and highlights the recent development of mathematical models and tools, including PH software andPH-based functions, feature representations, kernels, and similarity models. Expand

113 Springer Nature Save Cite

Automatic targetless LiDAR–camera calibration: a survey

Xingchen Li · Yuxuan Xiao · Beibei Wang · Haojie Ren · Yanyong Zhang · Jianmin Ji

Engineering, Environmental Science · Artificial Intelligence Review · 23 November 2022

The recent trend of fusing complementary data from LiDARs and cameras for more accurate perception has made the extrinsic calibration between the two sensors critically important. Indeed, to align… Expand

85 Springer Nature Save Cite

Heuristic and metaheuristic methods for the parallel unrelated machines scheduling problem: a survey

Marko Đurasević · D. Jakobović · Computer Science, Engineering · Artificial Intelligence Review · 25 August 2022

TLDR An extensive literature **review** on the application of heuristic and metaheuristic methods for solving the unrelated parallel machines scheduling problem (UPMSP). Expand

65 Springer Nature Save Cite

A survey of safety and trustworthiness of deep neural networks: Verification, testing, adversarial attack and defence, and interpretability

Xiaowei Huang · D. Kroening · +5 authors · Xinping Yi · Computer Science, Engineering · Computer Science Review · 18 December 2018

TLDR A **review** of the current research effort into making DNNs safe and trustworthy, by focusing on four aspects: verification, testing, adversarial attack and defence, and interpretability. Expand

574 PDF Publisher Save Cite

A survey on binary metaheuristic algorithms and their engineering applications

Jeng-Shyang Pan · Pei Hu · V. Snášel · S. Chu · Engineering, Computer Science · Artificial Intelligence Review · 21 November 2022

TLDR This article presents a comprehensively state-of-the-art investigation of the engineering applications utilized by binary metaheuristic algorithms, and describes these algorithms in detail to help researchers choose appropriate methods to solve related applications. Expand

ACCEPT & CONTINUE

Ngan T. H. Le | V. Rathour | Kashu Yamazaki | Khoa Luu | M. Savvides

Artificial Intelligence Review · 25 August 2021

TLDR This work provides a detailed **review** of recent and state-of-the-art research advances of deep reinforcement learning in computer vision, and proposes a categorization ofDeep reinforcement learning methodologies and discusses their advantages and limitations. Expand

Role of machine learning in medical research: A survey

Arunim Garg | Vijay K. Mago | Medicine, Computer Science · Computer Science Review · 1 May 2021

TLDR This literature **review** identifies a clear shift of artificial intelligence techniques used in the medical domain, with deep learning methods taking precedence over machine learning methods. Expand

Deep transfer learning for image classification: a survey

J. Plested | Tom Gedeon | Computer Science · Artificial Intelligence Review · 20 May 2022

TLDR It is demonstrated that under this new taxonomy, many of the applications where transfer learning has been shown to be ineffective or even hinder performance are to be expected when taking into account the source and target datasets and the techniques used. Expand

Post-wildfire soil erosion in the Mediterranean: Review and future research directions

R. Shakesby | Environmental Science, Geography · 1 April 2011

Abstract **Wildfires** increased dramatically in frequency and extent in the European Mediterranean region from the 1960s, aided by a general warming and drying trend, but driven primarily by… Expand
