Survey on reinforcement learning for language processing

Víctor Uc Cetina · Nicolás Navarro-Guerrero · A. Martín-González · C. Weber · Stefan Wermter

Computer Science, Linguistics · Artificial Intelligence Review · 12 April 2021

TLDR The state of the art of RL methods for their possible use for different problems of NLP, focusing primarily on conversational systems, is **reviewed**, mainly due to their growing relevance. Expand

Deep Learning for Intelligent Demand Response and Smart Grids: A Comprehensive Survey

Viet Quoc Pham | Madhusanka Liyanage | +7 authors | W. Hwang

Engineering, Computer Science · Computer Science Review · 20 January 2021

TLDR A comprehensive **survey** on the application of deep learning for intelligent smart grids and demand response, including electric load forecasting, state estimation, energy theft detection, energy sharing and trading is provided. Expand

Video super-resolution based on deep learning: a comprehensive survey

Hongying Liu | Zhubo Ruan | Peng Zhao | Fanhua Shang | Linlin Yang | Yuanyuan Liu

Computer Science · Artificial Intelligence Review · 25 July 2020

TLDR This work comprehensively investigates 37 state-of-the-art VSR methods based on deep learning and proposes a taxonomy and classify the methods into seven sub-categories according to the ways of utilizing inter-frame information. Expand

A survey on feature selection methods for mixed data

Saúl Solorio-Fernández | J. A. Carrasco-Ochoa | José Francisco Martínez Trinidad

Computer Science · Artificial Intelligence Review · 29 September 2021

TLDR This paper provides the first comprehensive and structured revision of the existing supervised and unsupervised feature selection methods for mixed data reported in the literature. Expand
