About 390,000 results for “survey review wildfire”

Fields of Study | Date Range | Has PDF | Author | Journals & Conferences | More Filters | Filters | Sort by Relevance

A survey on privacy and security of Internet of Things

M. Ogonji | G. Okeyo | Joseph Muliaro Wafula | Computer Science, Engineering ·

Computer Science Review · 1 November 2020

TLDR A comprehensive discussion on the current state of the art of IoT, with particular focus on what have been done in the areas of privacy and security threats, attack surface, vulnerabilities and countermeasures and to propose a threat taxonomy is provided. Expand

Applications, databases and open computer vision research from drone videos and images: a survey

Y. Akbari | Noor Almaadeed | S. Al-Maadeed | O. Elharrouss | Computer Science, Engineering ·

Artificial Intelligence Review · 22 February 2021

TLDR A complete **review** of databases in the first two groups and works that used the databases to apply their methods are presented, and vision-based intelligent applications and their databases are explored. Expand

A review of named entity recognition: from learning methods to modelling paradigms and tasks

Wei Liang Seow | I. Chaturvedi | Amber Hogarth | Rui Mao | Erik Cambria | Computer Science ·

Artificial Intelligence Review · 16 July 2025

TLDR It is concluded that pre-trained NER models are limited in their ability to model new entities and disambiguate their context and using the sentiment score together with a state space model over entities in a sentence might help overcome these challenges. Expand

How the recursive feature elimination affects the SVM and RF for wildfire modeling? A mountainous case study area

Ali Rezaei Barzani | P. Pahlavani | O. Ghorbanzadeh | Pedram Ghamisi

Environmental Science, Computer Science · 2023

. This study aims to identify key fire factors via recursive feature elimination (RFE) to generate forest fire susceptibility map (FSM) using support vector machine (SVM), and random forest (RF)… Expand

A review of operations research methods applicable to wildfire management

J. Minas | J. Hearne | J. Handmer | Environmental Science · 30 May 2012

Across the globe, **wildfire**-related destruction appears to be worsening despite increased fire suppression expenditure. At the same time, **wildfire** management is becoming increasingly complicated owing… Expand

Peer Effects in Networks: A Survey

Yann Bramoullé | Yann Bramoullé | H. Djebbari | B. Fortin | Economics ·

Annual Review of Economics · 2 August 2020

TLDR This work **surveys** the recent, fast-growing literature on peer effects in networks and discusses and assess the various approaches developed by economists to account for correlated effects and network endogeneity in particular. Expand

Rakesh Kumar Rinkaj Goyal Computer Science · Computer Science Review · 1 August 2019

TLDR This study contributes towards identifying a unified taxonomy for security requirements, threats, vulnerabilities and countermeasures to carry out the proposed end-to-end mapping and highlights security challenges in other related areas like trust based security models, cloud-enabled applications of Big Data, Internet of Things, Software Defined Network (SDN) and Network Function Virtualization (NFV). Expand

Rethinking Response Rates: New Evidence of Little Relationship Between Survey Response Rates and Nonresponse Bias

R. Hendra Aaron Hill Economics · Evaluation review · 1 October 2019

TLDR The costly pursuit of a high response rate may offer little or no reduction of nonresponse bias, and the results indicate that the pursuit of high response rates lengthens the fielding period, which can create other measurement problems. Expand

Nature-Inspired Algorithms for Wireless Sensor Networks: A Comprehensive Survey

Abhilash Singh Sandeep Sharma Jitendar Singh Computer Science, Engineering · Computer Science Review · 24 December 2020

TLDR This paper has compared the performance of two nature-inspired optimization algorithms for getting optimal coverage in WSNs and observed that the optimal coverage is achieved at a lesser number of generations in LO as compared to IGA-BACA. Expand

A comprehensive review on financial explainable AI

Wei Jie Yeo Wihan van der Heever Rui Mao E. Cambria Ranjan Satapathy G. Mengaldo

Computer Science, Business · Artificial Intelligence Review · 21 September 2023

TLDR A comparative **survey** of methods that aim to improve the explainability of deep learning models within the context of finance and describes the collection of explainable AI methods according to their corresponding characteristics. Expand
