Arabic question answering system: a survey

Tahani H. Alwaneen | Aqil M. Azmi | Hatim Aboalsamh | E. Cambria | Amir Hussain

Computer Science, Linguistics · Artificial Intelligence Review · 12 July 2021

TLDR The challenges due to the language and how these challenges make the development of new Arabic QAS more difficult are discussed, followed by an in-depth analysis of the techniques and approaches in the three modules of a QAS. Expand

Mining and classifying customer reviews: a survey

L. Subhashini | Yuefeng Li | Jinglan Zhang | Ajantha S Atukorale | Yutong Wu

Computer Science, Business · Artificial Intelligence Review · 1 March 2021

TLDR This article reports on a detailed **survey** of recent opinion mining literature and **reviews** how to extract text features in opinions that may contain noise or uncertainties, how to express knowledge in opinions, and how to classify them. Expand

A state-of-the-art survey of object detection techniques in microorganism image analysis: from classical methods to deep learning approaches

Pingli Ma | Chen Li | +5 authors | Marcin Grzegorzek | Computer Science, Biology · Artificial Intelligence Review · 7 May 2021

TLDR This **review** will help researchers have a more comprehensive understanding of the development process, research status, and future trends in the field of microorganism detection and provide a reference for researchers in other fields. Expand

Examining the influence of biophysical conditions on wildland-urban interface homeowners' wildfire risk mitigation activities in fire-prone landscapes

Christine S. Olsen J. Kline A. Ager K. Olsen K. Short Environmental Science ·

23 February 2017

Expansion of the wildland–urban interface (WUI) and the increasing size and number of **wildfires** has policy-makers and **wildfire** managers seeking ways to reduce **wildfire** risk in communities located… Expand

How the recursive feature elimination affects the SVM and RF for relative wildfire susceptibility in a certain area? A study case in Northern Iran

Ali Rezaei Barzani P. Pahlavani O. Ghorbanzadeh Pedram Ghamisi Environmental Science ·

2023

. This study aims to identify key fire factors via recursive feature elimination (RFE) to generate forest fire susceptibility map (FSM) using support vector machine (SVM), and random forest (RF)… Expand
